- git

About me

I'm a front-end developer with nearly 4 years of hands-on experience in crafting exceptional web solutions.
I'm passionate about writing, creating clean and efficient code that results in stunning, user-friendly experiences.

Work history

Software Engineer at From Poland With Dev
July 2024 - current
- Introducing new functionalities and managing key features of a mobile app designed for VR-based sports training, enhancing user experience and improving overall performance tracking.
- Integrated real-time feedback tools to help athletes and coaches monitor performance and optimise training through detailed virtual simulations, while the platform used separate AI-driven systems for advanced swing analysis.

Stack: TypeScript + React Native + Redux + Redux Saga + styled-components

Software Engineer at Brüel & Kjær Vibro
March 2024 - July 2024
- Introducing new functionalities and managing key features both backend and frontend layers of a IoT platform.
- Platform collects and analyses data from vibration sensors worldwide using AI to detect and display vibration changes that could damage machines.

Stack: TypeScript + ReactJS + GraphQL + NodeJS + ExpressJS + AWS + DynamoDB + Cypress + styled-components

Frontend developer at ReasonApps
February 2022 - March 2024
- Introducing new functionalities and managing key features the frontend layer of an e-commerce platform that connects influencers with their fans.
- Building a marketing platform from scratch for influencers marketing company. Managing the entire development process from initial idea, through development to the final deployment.

Stack: TypeScript + ReactJS + NextJS + GraphQL with Hasura + TailwindCSS + SASS + Cypress

Education

AGH University of Science and Technology
Postgraduate studies

October 2023 - June 2024
Software Development Methods
Learning about whole process of creating a software. Starting from business analysis, through projecting how system should work using UML and OOP design patterns, to developing whole system using modern frontend, backend and mobile technologies such as Java, JavaScript/TypeScript and Vue.

Cracow University of Technology
Bachelor of Engineering

October 2018 - January 2022
Transport, Engineering studies
My graduate work focused on the technologies and software used in rail transport for passenger communication.
